

Software
Command. Control. Inform.

Meridian Mobile

This software allows you to monitor resource deployment and demand allocations complemented by a fully integrated mobile data system.

Mission Critical Software

Delivering software solutions which, through our customers, make a **positive difference** to people's lives.

Collect real time information on arrival and departure times, track your vehicles and monitor fuel consumption – Meridian Mobile enables you to have total visibility of your organisation.

Meridian Mobile is tightly integrated into the core Meridian system and our developers ensure that your PTS business rules are embedded within it. These rules ensure that you can deliver detailed reports in terms of pick up times, drop off times and length of time on the vehicle.

At a glance...

Seamless integration

into Meridian Command and Meridian Web

Modern touch screen interface
designed for road staff

Communications
bearer
4G/3G/GPRS

Total remote app
management
and upgrades

Complete alignment
with your contract rules

Increase efficiency and excellence:

- Our developers embed your contract rules within the system so you can monitor and report on performance against these
- Meridian Mobile collects performance data automatically which means it is always accurate
- Reduce voice traffic from control by using the messaging service
- Increase work allocation by using electronic delivery of work

Cost savings:

- Reduce data entry time and paperwork
- Speed up work allocation by delivering work electronically to the mobile device
- Uses sat nav to route vehicles which means they take the most efficient route saving time and fuel costs

The Meridian system has enabled us to tighten up our plan and dramatically improve our efficiencies

London
Ambulance

Secure

- AES encryption of all data
- Device cache encryption
- Remote data removal if device is stolen (including clearance of cache)
- Automatic time out to clear data
- Secure user logon to the Meridian Mobile apps gateway
