# Guardian Command

Mobilising for the 21st century

3tc

A full end to end Control Room solution

Guardian Command is a state of the art, modern Command and Control system for emergency services Control Rooms. The system is designed to enhance and streamline the way Control Rooms carry out their duties with a view to help the emergency services do their job more efficiently.

3tc Software has taken the knowledge and experience from developing Control Room solutions for the emergency services over the last 30 years and designed and built Guardian Command from the ground up, using modern development tools and technology by ex control room staff.

Guardian Command is modular and scalable to meet different levels of requirements and price-points providing the flexibility to meet different control room requirements which are configurable by yourselves.
