

## Smarter Planning, Enhanced Incident Management, Safer Incident Ground

MODAS Web provides access to mission critical information such as SSRI data sets, live resource location updates (AVL) and other Points of Interest information using a simple and intuitive web solution. Users can interact with the POI datasets to gain further situational intelligence to improve decision making and to act decisively.

Fire and Rescue Services can integrate and display all their relevant datasets with MODAS Web allowing authorised users to view POI details such as:

- Hydrants
- 7(2)d Risk Cards
- National Operational Guidance
- Standard Operating Procedures
- Building Plans
- Home Fire Safety Checks

POIs datasets are the same as those used on MDTs

## Benefits

- Shared Common Operating Picture available in real time including Live Resource Tracking, Status, Speed and Direction information
- Actionable Intelligence to support decisions
- Layered Data for Point of Interest Data sets such as SSRI, Hydrants etc.
- Playback of AVL History integrated with Google Street View
- Seamless Integration with FRS data sets
- Simple to Use and Train
- Wall Display Mode showing live location and status of all resources
- Device Agnostic
- Secure with Active Directory Access
- Standards based Mapping Server
